

ACDelco Subscription Definitions

ACDelco offers a General Motors Service Information (GMSi) and the Techline Information System (TIS) through an internet based subscription service. These subscriptions allow access to tools that support your service repair business. Many easy and affordable subscription options are available to you:

Subscriptions

- **General Motors Service Information (GMSi)** – This is ACDelco’s encyclopedia for GM technical service information*. GMSi provides web based publications for North American built vehicles, updated by GM on a daily basis. Publications include:

- Service Manual (1998 - present)
- Collision Repair Manuals (1998 – present)
- Technical Service Bulletins (1980 to present)
- Owner Manuals (2003 to present) and other glove box materials (2003 to present)

**This is not a programming package. See ACDelco’s subscriptions below for diagnostics and programming software.*

\$20/3 days, \$150 per month, \$1,200/year OR \$900 at PSC & KFLT Program Participant Discount Rate

- **Complete GM Support Service Package** – This is a comprehensive bundle of TIS2Web subscriptions. Collectively they are equivalent to what GM dealers use today. This subscription includes:

- GMSi
- Tech2 diagnostic software updates
- Tech2 Snap Shot
- Service Programming Software
- Tech2Win**
- GDS2*

\$3,125/year

**GDS2 requires a GM MDI or J2534-2 equivalent. [GDS2 Supported Vehicle List.](#)*

***Tech2Win requires an ISO 22900 PDU API compliant device*

- **Tech2 and Service Programming Package** – This subscription bundles two annual subscriptions commonly used together at a reduced price. The package provides GM and Saturn software for updating vehicle calibrations and Tech2 diagnostic software updates. Subscription includes:
 - Tech2 diagnostic software updates
 - Tech2 Snap Shot
 - Service Programming Software
 - Tech2Win**

\$1395.00/year

***Tech2Win requires an ISO 22900 PDU API compliant device*

- **Service Programming System (SPS)** – This web interface allows technicians to update calibrations and perform setups and configurations to vehicle modules. Subscription includes: GM and Saturn software to update vehicle calibrations.

\$55.00/2 days, \$275.00/3 months, \$995.00/year

[Vehicle calibrations](#) may be looked up at no charge

- **Tech2 Diagnostic Software Download:** GM software provides the most comprehensive diagnostic software updates for late model GM vehicles through the Tech2 device which also supports onboard diagnostics and full bi-directional control when performing powertrain, chassis and body diagnostics. \$750.00/year
- **Global Diagnostic System 2* (GDS2):** This PC based diagnostic software is designed for use by trained service personnel to diagnose and repair automotive electronic systems. GDS2 applies to some 2010-2013 model year and all newer GM vehicles. GDS2 features:
 - Read codes, code status, Freeze Frame data and Clear Codes
 - Read VIN, ECU part numbers and software numbers
 - Record, store and replay Stored data
 - Control and monitor Output Control functions
 - Configure and Reset functions
 - Display history of the previous vehicle diagnostic sessions

\$57.00/3 days, \$227.00/month, \$575.00/year

**GDS2 requires a GM MDI or J2534-2 equivalent. [GDS2 Supported Vehicle List](#).*

- **Tech2Win Software** - Tech2Win** is a PC program that executes Tech2 diagnostic software on a Windows PC. Tech2Win communicates with a vehicle through a vehicle communication interface (VCI) to run diagnostics on GM vehicles. *Note: Tech2Win is not a programming tool.*
\$55/3 days

***Tech2Win requires an ISO 22900 PDU API compliant device*

- **GM Vehicle Communication Interface (VCI) Package:** This subscription bundles GDS2* and Tech2Win** into a single package. It provides the service diagnostic application used to pull Diagnostic Trouble Codes (DTCs) and view vehicle data parameters. It also provides the PC based Tech2 emulation software, a program that resides on a computer and is used in conjunction with the MDI to emulate a Tech2.

Note: Tech2Win is not a programming tool.

\$775/year

**GDS2 requires a GM MDI or J2534-2 equivalent. [GDS2 Supported Vehicle List](#).*
