

ACDelco TIS2Web/GMSi System Requirements Summary

ACDelco provides infrastructure guidelines specifically designed to ensure a seamless and reliable conduit for GMSi and TIS2Web data communications. Please review and adhere to the following infrastructure guidelines prior to purchasing TIS2Web & GMSi.

Independent repair shops may choose processor speeds, memory capacities, audio adapters and hard drive capacities which exceed the recommended specifications based on needs and product availability.

For Techline Technician service applications (TIS2Web, GDS2, MDI, MDI 2, Tech2Win, Service Information)

Supported	Not Supported
Intel i3 / i5 / i7 processors	ALL Processors <u>below</u> the Intel I series plus AMD, Celeron and Atom processors
Business grade hardware (PC and Access Points)	Consumer grade hardware (PC and Access Points)
Windows 7 Professional, 32 and 64 bit	Non branded, built by hand or thin client PC's
Windows Vista Business 32 bit, SP1	Tablets running Android or Mac operating systems
Internet Explorer (IE) 11	Windows XP or XP Mode / Virtual PC
	Any Home version of operating system
	Windows 8.X (any version)
	Java 64 bit version
	Internet Explorer 64 bit version
	Apple or Mac tablets / PC's

For Service Programming System (SPS) purposes, a repair shop may be required to purchase a USB drive to perform programming on a Radio/Navigation or Instrument Panel Cluster (IPC) system. The following specification should be used when purchasing the USB drive - USB 2.0 compliant flash drive 4GB or greater.

- ACDelco application updates require Local Windows Administrative access for software installation and updates.
- ACDelco estimates the life cycle of a Desktop PC, Laptop or Tablet PC on average is three (3) years.

NOTE: Computers purchased preinstalled with Windows® 8.1 Pro software may include downgrade rights to Windows® 7 Professional. Contact your PC manufacturer or refer to Microsoft's website for further details regarding eligibility and options available.

WARNING: Microsoft released Windows 10 on July 29, 2015. **DO NOT** update to the new operating system until General Motors communicates Techline applications are compatible.

For more comprehensive documentation of infrastructure guidelines, system requirements and recommended firewall/security exceptions, access [GM IT Guidelines](#) which also apply to independents, Professional Service Centers and Key Fleets using ACDelco Aftermarket subscriptions. For questions on these guidelines, contact 888-212-8959, prompt #2.
